

BACKIT CLOUD APPLICATION BACKUP (ICAB)

Protect your mission-critical SaaS data & overcome limited retention policies.

Microsoft 365 · Google G Suite · Salesforce · Box · Dropbox

Why Do You Need SaaS Application Backup?

Leading SaaS providers only allow retention of accidentally or maliciously deleted data for a limited time — afterwards the data is gone forever. ICAB provides unlimited history and protects against accidental/malicious deletion, corruption, and ransomware.

Microsoft
90 days

Google
30 days

Salesforce & Box
14 days

Protection For:

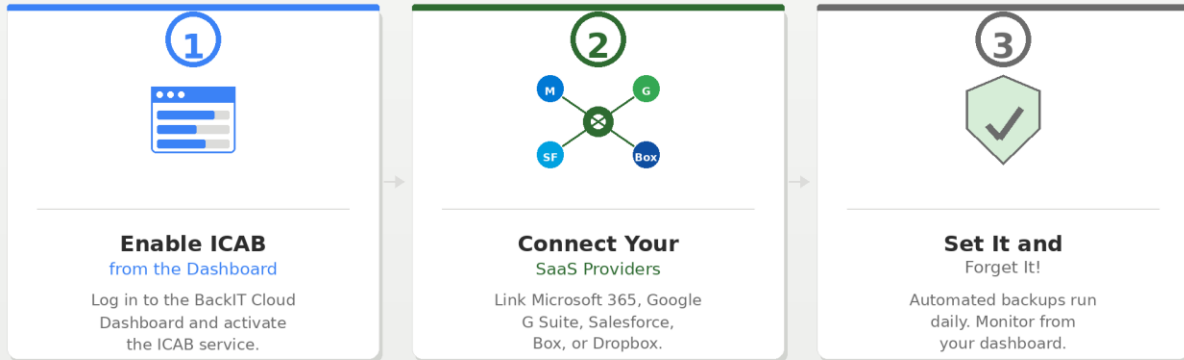

- Microsoft 365: Exchange Online, Teams, OneDrive & SharePoint
- Google G Suite & Team Drives
- Box
- Dropbox
- Salesforce

Features & Benefits

DATA CONTROL	RISK CONTROL	OPERATIONS & COST CONTROL
Set It and Forget It • Backup all plans, all data for supported SaaS apps • Fully automated or on-demand backups	Retention Policy Gaps • Close the gap between SaaS provider and corporate/legal/regulatory policy	Zero Adoption Effort • Cloud-based deployment • Single pane-of-glass management • Daily backup reports
Recovery – Fast & Easy • Search by date or keyword to locate and recover data • Restore to original account, or to an alternate	Ransomware Protection • AES-256 encryption at rest and in-transit • Start ransomware recovery in seconds	Non-Destructive Restore • Recover from anywhere, at any point in time • Won't overwrite existing data
Unlimited Restorations • Unlimited history! • Complete point-in-time restoration via point-and-click	Long-Term Retention • Unlimited retention of daily archives • Prepared for discovery and litigation	Easy Workforce Mgmt. • Simple on/off-boarding; bulk activation • Automated adds/drops of users
Reliable 24/7 Access • Recovery even when SaaS provider is down or unavailable	Data Sovereignty • Data in your choice of: US, Canada, EU/Ireland, or Australia • UK coming soon!	Save Costs • Pay-as-you-go (seat or storage packs) • No additional 3rd-party licenses required

HOW IT WORKS

Three simple steps to protect all your SaaS data

- 1. Enable ICAB from the Dashboard** – Log in to the BackIT Cloud Dashboard and activate the ICAB service.
- 2. Connect to Your SaaS Provider** – Link your Microsoft 365, Google G Suite, Salesforce, Box, or Dropbox accounts securely.
- 3. Set It and Forget It** – Automated backups run daily. Monitor cloud usage and backup status from the single-pane-of-glass dashboard.

Supported SaaS Applications

Microsoft 365 Exchange Online, SharePoint, OneDrive, Teams	Google G Suite Gmail, Docs, Drive, Contacts, Calendar, Chats	Salesforce Org data, Chatter feeds, metadata	Box Files and folders	Dropbox Files and folders
